HOW TO EXPORT A PDF FROM QUARK 7, 8, & 9

NOTICE: We have noticed color shifts when moving from an older version of Quark to Quark 7. To minimize this we ask all customers with Quark 7 to change the Color Management Settings by going to the Preferences under QuarkXpress and selecting Color Management and changing the Source setup to **QuarkX- press Emulate Legacy.**

Create a new Output Style for Exporting PDFs by navigating to Edit then down to Edit Output Styles. Then choose New - PDF.

Name the PDF Style (we used JPA Export)

PDF Style:	JPA Export
Verification:	None
Pages Meta Data Hyperlinks Compression Color Fonts Marks Bleed Transparency OPI JDF Summary	Page Options Spreads Export pages as separate PDFs Include Blank Pages Embed Thumbnail Color Thumbnail
	Cancel

Edit DDE Style

Now continue down the left side changing options to JPA specifications

Pages - all page options should be unchecked

Meta Data - You may type anything you want here or leave it all blank

Hyperlinks - Include Hyperlinks should be unchecked

Once all settings have been changed click OK and then Save at the output style window.

To export a pdf go to File - Export - Layout as PDF

Give your file a name, select the location, and type in the page range you want to include in your PDF. Then select the PDF Style that was just created (JPA Export) and press Save. Continue with all remaining pages until all pages have been exported to PDFs.
